---

## Summary

Mobile & Frontend Developer with over **4 years of experience** building responsive, accessible, and **high-performance applications** for mobile and web. Specialized in React, React Native, TypeScript, and Next.js, with a strong focus on clean code, scalable architecture, and seamless user interfaces. Native in **French** and fluent in **English**.

---

## Projects

### Treize - [Github](#) as Full-Stack Mobile Developer

- Engineered a cross-platform mobile application, implementing reusable UI components, optimized navigation with **Expo Router**, and smooth animations using **Reanimated**.
- Architected a full-stack solution with **Supabase** (Postgres, Auth, Edge Functions) and **Express.js**, ensuring **real-time data synchronization** and secure API communication.
- Integrated **Cloudflare R2 storage**, leveraging **Zustand** for state management and **TanStack Query** for efficient server-state handling and **caching**.

**Skills:** React Native, Typescript, Expo, Supabase, Zustand, TanStack Query, Cloudflare, [Express.js](#), Xcode, Android Studio, Push Notifications, Analytics, Crash Reporting, EAS.

### Kori Pay - [IOS](#) · [Android](#) as UI/UX Designer & Mobile Developer

- Led the UX/UI design of a fintech platform offering virtual cards, **peer-to-peer transfers**, and **seamless online payments**, with a focus on transparency, security, and budget control.
- Designed responsive, accessible user flows for key features like multi-card generation, expense tracking, and **payment workflows**, ensuring a **smooth and intuitive experience**.
- Contributed to mobile development by implementing **reusable components** and refining interactions to align with the design vision.

**Skills:** Figma, React Native, Typescript, Expo, Redux, Xcode, Android Studio, Push Notifications, Analytics, Crash Reporting, EAS.

### Payme App - [IOS](#) · [Android](#) as Mobile Developer

- Joined the mobile team to **maintain** and improve a business management application used for **invoicing, sales tracking, inventory management**, and **online store operations**.
- Contributed to the stability and evolution of the mobile app by **fixing issues, improving existing features**, and **optimizing performance** across iOS and Android platforms.

- Currently working on the development of a new **marketplace-style mobile application** that aggregates products from multiple online stores into a single platform, simplifying **product discovery** and **purchasing**.

Skills: React Native, TypeScript, Expo, API Integration, Mobile App Maintenance, Performance Optimization, Xcode, Android Studio, Push Notifications, Analytics, Crash Reporting, EAS.

### O-Bambu App - [IOS](#) · [Android](#) as Full-Stack Mobile Developer

- Built a mobile app to handle service browsing, **real-time booking**, and **subscription management**.
- Designed a **modular architecture** separating UI, logic, and API layers for **scalability** and **maintainability**.
- Integrated Supabase for auth, database, and RLS-secured booking flows; used Zustand for persistent user state.
- Developed dynamic service catalog UI with **optimized navigation**, asset loading, and **accessibility** in mind.

Skills: React Native, Typescript, Expo, Supabase, Zustand, Xcode, Android Studio, Push Notifications, Analytics, Crash Reporting, EAS.

### Kabakoo App - [IOS](#) · [Android](#) as UX/UI Designer & Mobile Developer

- Built a mobile app to deliver **personalized learning experiences** for African youth, featuring gamified progression, **AI mentoring**, and a strong community layer.
- Designed and implemented core flows including course navigation, mentorship access, and project tracking, optimized for both engagement and usability.
- **Focused on performance**, accessibility, and local device storage to support users in low-connectivity environments and with **low end devices**.

Skills: Figma, Pitch, React Native, Expo, Redux, EAS, AWS

### Yumi - [IOS](#) as Mobile Developer

- Built a lightweight mobile app to convert **currencies in real-time** using data from the FloatRates API.
- Designed a minimal, user-friendly UI with quick selection, search, and automatic base currency detection.
- Implemented **offline-friendly caching** and smooth UX transitions for **fast and responsive performance**.

Skills: React Native, Typescript, Expo, EAS.

### Web projects - [O-Bambu Website](#) · [Maison Amoa](#) · [Bamako Art Gallery](#) · [Kabakoo Website](#)

Skills: React, Next.js, Typescript, GSAP, Figma, Sanity.io
